ROBERT BOSCH POWER TOOLS GMBH EXPERT FOR WOOD SLOTTING CUTTER, 8 MM, D1 50.8 MM, L 4 MM, G 8 MM. FOR HAND-HELD ROUTERS

SKU: 3165140802345

Expert for Wood Slotting cutter, 8 mm, D1 50.8 mm, L 4 mm, G 8 mm. For hand-held routers

---

Categories: Accessories for BOSCH professional, Cutters and planing knives

Product Features: Shank mm: 8
Diameter (D) mm: 50,8
Working length (L) mm: 4
Benefit HL (short): Lifetime of Splinter-Free Cutting for Slotting
Performance Claim Text: For Slotting
(Version) Key RTB: In-house manufactured using Microteq carbide for high durability and performance
Specific RTB1: Cleanteq coating keeps the blade cool by reducing the adhesion of residues and protects the bit body from corrosion
Specific RTB2: High pressure and heat-hardened body for ideal performance precision and longevity
Specific RTB3: Ideal for slotting grooves in narrow edges and decorative slots. Kickbacks prevented by limiting chip-thickness
Material: Hardwood
Material: Particleboard
Material: Medium density fibreboard
Material: Plywood
Material: Softwood
SOL Date: 01.09.2014
Novelty: no

1 ST Expert for Wood Slotting cutter, 8 mm, D1 50.8 mm, L 4 mm, G 8 mm. For hand-held routers |

PRODUCT DESCRIPTION

The Expert for Wood Slotting Cutter offers a long lifetime of everyday use in delivering splinter-free cuts in slot-cutting. The slotting cutter is in-house manufactured using unique Microteq carbide for high durability and performance in wooden applications. Furthermore, it features a Cleanteq coating that keeps the blade cool by reducing the adhesion of glue and resin residues, as well as protecting the bit body from corrosion. Its body is hardened through high pressure and heat to maximise its performance precision and longevity. It is intended for routing slots in narrow edges as well as decorative slots. The Expert for Wood Slotting Cutter with 4-mm thickness is also excellent for inserting biscuit dowels. It can be used in soft and hard solid wood as well as in wood composites and special materials like solid surface. Slotting cutter design prevents kickbacks by limiting the thickness of the generated chips.
