## PRODUCT DESCRIPTION

Polyethylene (PE)
- The material LD-PE is made from recycled PE
- HD and LD PE are completely neutral to groundwater in landfills
- No harmful exhaust gases are released during incineration, which ensures easy combustion, since PE consists of the elements carbon and hydrogen HD-PE = Produced with low-pressure process, tough and elastic, giving it high piercing resistance LD-PE = Produced with high-pressure process, very resilient and soft, thus hardly "tearing" when pierced
