PRODUCT DESCRIPTION

The Heavy for Inox Bevel Brush provides an extra-coarse surface finish. The conical bevel brush is fitted with knotted wire for heavy-duty cleaning applications in hard-to-reach areas. It is suitable for cleaning smaller stainless steel, aluminium or non-ferrous metal surfaces, on edges or in grooves at high circumferential speeds. Furthermore, the brush is suitable for removing heavy rust, paint stripping, deslagging, deburring, descaling and cleaning welding seams. Brush wires are available in different thicknesses for variable levels of abrasive needs. Thicker wires are more aggressive, producing a coarser yet faster surface finish, while thinner wires deliver finer, smoother surface results.
