(Version) Key RTB: Semi-friable aluminium oxide grit is robust and wear-resistant, producing a consistent finish
Specific RTB1: Sturdy backing material is x-cloth: for stability when grinding
Specific RTB3: Fully synthetic resin bonding for durability. The carrier plate is available in angled and straight, fibreglass and plastic
Material: Steel
SOL Date: 01.07.2015
Novelty: no

Scope of delivery:
10 ST X431 flap disc, Standard for Metal. For small angle grinders |

PRODUCT DESCRIPTION

The X431 Standard for Metal provides a good finish when grinding edges and welded seams as well as coarse-sanded metal surfaces. Its semi-friable aluminium oxide grit is robust and wear-resistant, producing a consistent finish. The sturdy backing material is x-cloth: providing stability when grinding for clean and even results. The grit is bonded using fully synthetic resin for wear resistance in heavy-duty applications. The carrier plate is available in both angled and straight, fibreglass and plastic versions.
