BENNING PHASE/MAGNETIC FIELD TESTER VT 2 1-POLE OPTICAL/ACOUSTIC

SKU: 4014651440555

Phase/magnetic field tester VT 2 1-pole
optical/acoustic

Categories: [Measuring and testers for electrical installation](#), [Voltage and continuity tester](#)

Product Features: Display: Optical/acoustic
Working principle: 1-pole
Brand: BENNING

Scope of delivery:
1,00 ST Phase/magnetic field tester VT 2 1-pole optical/acoustic |

PRODUCT DESCRIPTION

Non-contact operation

- 1-pole phase tester with red LED test tip and increasing buzzer frequency
- Phase testing for sockets, junction boxes, switches, cables and lamps, etc.
- Testing insulated cables, such as cable reels, string lights, for cable break
- Voltage 12-1,000 V AC
- 12 V voltage range can be activated by button
- Capacitive measurement procedure
- Testing magnetic fields (permanent, alternating and direct current-induced solenoid valves in pneumatic and hydraulic systems, heating systems and pumps, relays/contactors in vehicles, machines, devices and control units
- Magnetic field display via green LED test tip
- Integrated test magnet for function check
- Cable break detector
- Cat IV 600 V, Cat III 1000 V
- IP53
- Length 153 mm
- Length of tip: 12 mm
- Blade width 3 mm Further technical information:
- Batteries: 2 x AAA

- Protection class: IP53 Supplied with batteries (2x type AAA pen clip, for replacement battery see article no. 4000 901 810 Note on the disposal of batteries and rechargeable batteries As we sell batteries and rechargeable batteries and devices that contain batteries and rechargeable batteries, under the German Battery Act (BattG we are obliged to draw your attention to the following: The symbol of the waste bin with the X through it on batteries and rechargeable batteries means that they must not be disposed on in household waste after consumption. If batteries or rechargeable batteries contain mercury, cadmium or lead, you will find the chemical symbol (Hg, Cd or Pb) under the symbol of the waste bin with the X through it. Every user of batteries or rechargeable batteries is legally obliged to return old batteries and rechargeable batteries. They can be returned, free of charge, to the retailer or another collection point near you. You can obtain the addresses of suitable collection points near you from your local government authority. In the case of batteries that contain more than 0.0005 percent by mass mercury, more than 0.002 percent by mass cadmium or more than 0.004 percent by mass lead, the chemical symbols of the respective harmful substance used are indicated under the waste bin symbol. The chemical symbols have the following meaning: Pb: Battery contains lead Cd: Battery contains cadmium Hg: Battery contains mercury

PRODUCT DATASHEET LEGAL NOTE

Please note that the information on this datasheet is provided without warranty and is intended only as non-binding information about the product. Any liability for damages or losses that may arise from the use of this information is excluded. We therefore recommend that you verify the information on this datasheet with other sources before making any decisions based on this information. Additional information about the product can be found on our website.
