BENNING PHASE-SEQUENCE INDICATOR TRITEST® PRO 400-500 V AC

SKU: 4014651200524

Phase-sequence indicator TRITEST® pro 400-500 V AC

Categories: [Installation testers](#), [Measuring and testers for electrical installation](#)

Product Features: Nominal voltage range:

400-500 V AC

Brand: BENNING

Model: 020052

[Datasheet](#)

Scope of delivery:

1,00 ST Phase-sequence indicator TRITEST® pro 400-500 V AC |

PRODUCT DESCRIPTION

Displays "clockwise" and "counterclockwise" field of rotation via green/red LED

- Displays phase voltages L1, L2 and L3 via red LED Measuring ranges:

- Voltage range: 400 V-500 V AC (50 Hz--60 Hz)

- Measurement category: CAT III 300 V

- Display stages: LED display for high-ohm resistances up to 90 k, for low-ohm resistances up to 900

Polarity detection for semiconductors (diodes, transistors) Test current VDE-tested and approved Further technical information:

- Equipment: LED light/magnetic holder Scope of supply: Phase-sequence indicator, 4 mm test tip set and alligator clip, magnetic holder and belt clip Supplied without batteries (requires 3 Mignon batteries / AA batteries see article no. 4000 901 811

PRODUCT DATASHEET LEGAL NOTE

Please note that the information on this datasheet is provided without warranty and is intended only as non-binding information about the product. Any liability for damages or losses that may arise from the use of this information is excluded. We therefore recommend that you verify the information on this datasheet with other sources before making any decisions based on this information. Additional information about the product can be found on our website.
