BENNING ROTATING FIELD/PHASE CHECK TRITEST® EASY 200-1000 V AC NON-CONTACT

SKU: 4014651200517

Rotating field/phase check TRITEST® easy
200-1000 V AC non-contact

Categories: [Measuring and testers for electrical installation](#), [Voltage and continuity tester](#)

Product Features: Display: Optical, acoustic
Measurement category: CAT IV 600 V
Nominal voltage range: 200-1000
Working principle: Contactless
Brand: BENNING

[Datasheet](#)

Scope of delivery:

1,00 ST Rotating field/phase check TRITEST®
easy 200-1000 V AC non-contact |

PRODUCT DESCRIPTION

Phase checking in three-phase supply network: Green/red LED probe tips for right/left rotating field

- Quick, contactless phase check in alternating current networks
- Checking phase balance and locating cable breakages in insulated and live wires
- Flashing frequency of the LED probe tips and acoustic signal frequency increasing in line with voltage level
- ON/OFF switches with standby LED for phase and rotating field check
- Overvoltage category: CAT IV 600 V, IEC / EN 61010-1
- Unbreakable, dust- and spray-proof ABS housing with pin clip
- Automatic shut down (AUTO POWER OFF) after 5 minutes Supplied with batteries (2 x type AAA for replacement batteries see article no. 4000 901 810 Note on the disposal of batteries and rechargeable batteries As we sell batteries and rechargeable batteries and devices that contain batteries and rechargeable batteries, under the German Battery Act (BattG we are obliged to draw your attention to the following: The symbol of the waste bin with the X through it on batteries and rechargeable batteries means that they must not be disposed on in household waste after consumption. If batteries or rechargeable batteries contain mercury, cadmium or lead, you will find the chemical symbol (Hg, Cd or Pb) under the symbol of the waste bin with the X through it. Every user of batteries or rechargeable

batteries is legally obliged to return old batteries and rechargeable batteries. They can be returned, free of charge, to the retailer or another collection point near you. You can obtain the addresses of suitable collection points near you from your local government authority. In the case of batteries that contain more than 0.0005 percent by mass mercury, more than 0.002 percent by mass cadmium or more than 0.004 percent by mass lead, the chemical symbols of the respective harmful substance used are indicated under the waste bin symbol. The chemical symbols have the following meaning: Pb: Battery contains lead Cd: Battery contains cadmium Hg: Battery contains mercury
