PRODUCT DESCRIPTION

EN 360
- In plastic housing with swivel suspension and wire rope, is used for work on buildings, chimneys or silos
- It should be attached overhead wherever possible to ensure proper functioning
- The wire rope runs automatically out of the sturdy housing and back in again when descending
- Due to the short braking distance, no additional fall damping is required
- These products are tested and approved for vertical and horizontal use with an anticipated load arising from a fall over an edge Further technical information:
- Subject to audit: Yes
