PRODUCT DESCRIPTION

High-quality, robust and durable, operable with one-hand, quick-lock coupling in safe design with high flow rates

- Decoupling takes place by pressing the pushbutton twice
- The first press vents the coupling, but the plug remains secured in the coupling
- With the second press, the plug is safely released
- This consequently prevents notorious 'whiplash accidents' and virtually eliminates risk of injuring the operator
- Conforms to ISO standard DIN EN ISO 4414 Further technical information:
- Flow volume (air): 1800 (at 6 bar, mounted plug and p = 1 bar)l/min

- Flow: 1600l/min
