Benefit HL (short): Fast Drilling in Metal
Performance Claim Text: Fast Drilling in Metal
(Version) Key RTB: High-speed drilling rates reduce heat generation and bit wear; PointTeQ tip ensures continual sharpness and durability
Specific RTB1: Self-centring tip prevents wandering for quick drilling starts; black-oxide-coated flute provides fast chip removal
Specific RTB2: Hex shank ensures a firm connection between bit and drill, and strengthens bit´s body for reduced risk of breakage
Specific RTB3: Split-point tip for active cutting

PRODUCT DESCRIPTION

The HSS Twist Drill Bit PointTeQ with hex shank delivers fast results when drilling in metal. Designed for high-speed drilling, it generates minimal heat and bit wear, and features a PointTeQ tip design that ensures continual sharpness and high durability. Its self-centring tip prevents wandering and enables quick and easy drilling starts, while its black-oxide-coated flute provides fast chip removal. For even higher reliability, the bit´s hex shank offers stability and a firm lock between the bit and chuck, strengthening the bit´s body and reducing the risk of breakage for drill bits below 6 mm in diameter. The HSS Twist Drill Bit PointTeQ's split-point tip allows for active cutting and perfect centring. Drill bit Type N (flute angle) with 135° tip, manufactured to DIN 338.
