PRODUCT DESCRIPTION

The Clean for Inox Bevel Brush provides an extra-fine surface finish. Its conical bevel brush is fitted with crimped wire for light- to medium-duty cleaning applications in hard to reach areas, making it ideal for the cleaning of smaller areas at high circumferential speeds. The brush can be used on stainless steel, aluminium or non-ferrous metal surfaces and on edges or in grooves. It is also suitable for removing rust, roughing, matt sanding, paint stripping and removing annealing colour on welded seams. Brush wires are available in different thicknesses for variable levels of abrasive needs. Thicker wires are more aggressive, producing a coarser yet faster surface finish, while thinner wires deliver finer, smoother surface results.
