The 34 Degree Clipped Head Strip Nails are for indoor construction tasks within usage class 1 (DIN EN 1995-1-1). The 34-degree collation angle and grooved shank shape ensure durable and secure connections in wood, roof, case and pallet construction as well as on door, window and furniture frames. Additionally, a resin coating allows the nails to be more easily driven into the material for better penetration and a strong hold. The 34 Degree Clipped Head Strip Nails are manufactured in Europe for consistently high quality.
