1 ST Cup Brush Crimped 60x0.3 mm  
Stainless. For rotary drills/drivers |

## PRODUCT DESCRIPTION

The Wire Cup Brush provides a good fine surface finish. It is fitted with crimped wire for light-to-medium-duty cleaning applications such as removing coatings, rust and paint stripping. The Wire Cup Brush is ideal for use on small-to-medium stainless steel, aluminium and non-ferrous metal surfaces. Moreover, it is also suitable for roughing, mat sanding, texturing and cleaning formwork boards and facings. Brush wires are available in different thicknesses for variable levels of abrasive needs. Thicker wires are more aggressive, producing a coarser yet faster surface finish, while thinner wires deliver finer, smoother surface results.
