## ROBERT BOSCH POWER TOOLS GMBH DETECTOR GMS 120

SKU: 3165140560108

Detector GMS 120

Categories: [BOSCH professional](#), [Measuring equipment](#)

**Product Features:** Bosch Radar Technology:  
no

Detectable objects: magnetic metals (e.g. iron)

Detectable objects: non-magnetic metals (e.g. copper)

Detectable objects: live cables

Detectable objects: wooden substructures

Max. detection depth: 120 mm

Detection depth, magnetic metal, max.: 120 mm

Detection depth, non-magnetic metal, max.: 80 mm

Detection depth, live cables, max.: 50 mm

Detection depth, wooden substructures, max.: 38 mm

Wall types: Drywall

Wall types: Universal

Dust and splash protection: IP 54

Material identification: Live cable

Material identification: Metal

Power supply: 1 x 9 V 6LR61

Automatic deactivation, approx.: 5 minutes

Weight, approx.: 0,27 kg

Product category subdivision: Detector

Positioning: Simple and intuitive - the logical favourite for locating objects effectively

User benefit incl. Reason to believe:

Automatic calibration avoids application errors for more reliable and confident work

User benefit incl. Reason to believe: Locate metal and live wire in various wall types as well as wooden substructures in drywall

User benefit incl. Reason to believe: Detects objects in walls before drilling for increased safety, ideal for renovation work  
Title: Detector GMS 120 Professional  
Novelty: no  
Scope of supply: Hand strap  
Scope of supply: Protective Bag  
Scope of supply: 1 x 9 V block battery (6LR61)  
SOL Date: 01.09.2010

Scope of delivery:  
1 ST Detector GMS 120 |

## PRODUCT DESCRIPTION

Detector GMS 120, Simple detection for safer work - the detector GMS 120 Professional is the favourite multi-detector in its class. Featuring automatic calibration, the tool avoids application errors, making it ideal for confident work. The tool delivers accurate measuring results for metal and live wire detection in various wall types and, specifically, wooden studs in the drywall mode. Locating objects in walls before drilling provides increased safety on the job, especially for craftsmen doing renovation work when fitting cabinets, kitchen counters, washbasins, boilers, and heating systems, or installing A/C and sprinkler systems. From wooden substructures in drywall (3.8 cm) and live cables (5 cm) to non-ferrous (8 cm) and ferrous metal (12 cm), this versatile tool detects a variety of materials for deep scans up to 12 cm. The GMS 120 Professional also includes a Centre Finder for a pinpoint indication of the centre of detected objects along with a reading of material properties. Its luminous three-colour LED ring clearly indicates whether or not objects are detected and features a marking hole within the ring for direct notation of each scanning result. This robust tool has rubber protection, a shockproof housing, and a water and dust protection class of IP54. Hand strap; Protective Bag; 1 x 9 V block battery (6LR61)
