PRODUCT DESCRIPTION

The End Brush provides a good coarse surface finish. It is fitted with knotted wire for heavy-duty cleaning applications on small surfaces. Due to its shape, the end brush is ideal for cleaning work in very hard-to-reach areas on stainless steel, aluminium and non-ferrous metal surfaces as well as in corners and the inside of pipes and profiles. It is also suitable for removing heavy rust and varnish as well as stripping paint. Brush wires are available in different thicknesses for variable levels of abrasive needs. Thicker wires are more aggressive, producing a coarser yet faster surface finish, while thinner wires deliver finer, smoother surface results.
