## PRODUCT DESCRIPTION

The Expert for Wood 45-degree Chamfering Bit has a long lifetime with daily use in performing splinter-free consistent chamfering. The bit is manufactured in-house using unique Microteq carbide for high durability and performance in wooden applications. It also features a Protection coating that protects it from friction, rust and pitch build-up, which extends the bit's superior cutting lifetime. It is intended for the consistent chamfering of 45-degree edges in soft and hard solid wood as well as in wood composites and special materials like solid surface. Chamfer sizes are easily adjustable by changing the bit height. The ball bearing allows for easy guiding directly on the workpiece without a side fence.
