Categories: Accessories for BOSCH professional, Cutters and planing knives

Product Features: Shank mm: 8
Diameter (D) mm: 5
Working length (L) mm: 12,7
Total length (G) mm: 50,8
Benefit HL (short): Long Lifetime and Splinter-free Cutting for Small Grooves
Performance Claim Text: For Small Grooves (Version) Key RTB: Bit is milled and ground in-house from solidified extra-hard Microteq carbide for high durability and performance
Specific RTB1: Proteqtion coating that protects bit from friction, rust and pitch build-up, extending its superior cutting lifetime
Specific RTB2: Computer-controlled balanced bit production provides bits with high-centricity and perfect rotational symmetry
Specific RTB3: Intended for routing small, precise grooves in soft/hard solid wood and wood composites. Special relief angle enables effortless plunge cutting
Material: Hardwood
Material: Particleboard
Material: Medium density fibreboard
Material: Plywood
Material: Softwood
SOL Date: 01.09.2014
Novelty: no

PRODUCT DESCRIPTION

The Expert for Wood Straight Bit Solid Carbide is designed for a long lifetime of heavy everyday use in delivering splinter-free cuts. The bit is uniquely milled and ground in-house from solidified extra-hard Microteq carbide for high durability and performance in wooden applications. Furthermore, it features a Proteqtion coating that protects it from friction, rust and pitch build-up, which extends the bits superior cutting lifetime. The bit is produced using computer-controlled balancing, giving it a high-centricity with perfect rotational symmetry for precision-smooth cuts. It is intended for routing small and very precise grooves in soft and hard solid wood and in wooden composites as well as in special materials like solid surface. They are especially ideal when routing for small diameters such as for slotting and jointing. The Expert for Wood Straight Bit Solid Carbide features a special relief angle that enables effortless plunge cutting.
