PRODUCT DESCRIPTION

The SDS plus-9 RebarCutter Drill Bit is specially designed for cutting through rebar in reinforced concrete. Its firmly fixed carbide teeth are uniquely shaped to maximise drilling speed and wear resistance. The bit's steep 2+2 flute design enables optimum dust removal and long lifetime. Moreover, this flute design is also vibration-optimised for the best power transfer and speed. Additionally, a ventilation hole in the bit dissipates heat and enables metal chip removal. Do not cut through rebar unless a structural engineer issues approval.
