1 ST HCS Multi blade ASZ 32 SC. For oscillating multitools |

PRODUCT DESCRIPTION

The Starlock ASZ 32 SC blade cuts efficiently through various materials. Its uniquely shaped design features a pull cutter blade edge on one side and push cutter on the other, making it a versatile cutting accessory. The special 24 mm wide pull cutter hook-shaped blade is designed for one-handed pull-cutting through overlapping materials such as carpeting without touching the ground. The 11 mm wide push cutter blade side easily cuts through flexible and tough materials with a pushing motion. This accessory cuts smoothly through resilient, soft, abrasive and hard-to-cut materials such as roof felt, carton, carpeting and artificial turf. It is suitable for use with all Starlock, Starlock Plus and Starlock Max power tools as well as common multi-tools. The Starlock Snap-In mounting system allows fast blade removal and exchange within 3 seconds without having to touch the blade. The mounting system produces the highest power transfer due to a 3-dimensional tight-fitting connection between machine and accessory.
