MultiConstruction Drill and Screwdriver Bit

Pack
SOL Date: 01.10.2016
Novelty: no

Scope of delivery:
5 ST Hex-9 MultiConstruction 5/6/8mm;
Impact Power Bit 50mm PH2, PZ2, T20, T25,
T30. For rotary drills/drivers |

PRODUCT DESCRIPTION

The Impact Control Screwdriver Bit is highly robust and ideal for heavy duty applications, even withstanding the high power of impact drivers. The bit features an extended torsion zone that makes it extremely sturdy for extended working times. S2 Modified Steel and an optimised heat-treatment process provide extra-tough endurance for high performance, including in plant installations or heavy industrial work. The HEX-9 MultiConstruction Drill Bit is ideal for use in practically all kinds of materials in interior fitting work. It features diamond-ground cutting edges for high wear resistance and a 2-flute U-shape that offers good dust removal and standard lifetime. Furthermore, its carbide tip provides for easy starting and good control when drilling. The bits are part of the Bosch Pick and Click system, which enables individually buildable accessory sets for fully customisable bit collections. Click-fitting slots perfectly secure individually purchased packs for a personalised collection and the easy replacement of old packs. The bits come in a plastic holder that click-fits into the Pick and Click Empty Cases M and L for personalised bit set variations.
