PRODUCT DESCRIPTION

The Impact Control Nutsetter is highly robust and even withstands the high power of impact drivers. Its extended torsion zone makes the nutsetter extremely sturdy for long-lasting work, whereas the S2 Modified Steel and optimised heat-treatment process provide extra-tough endurance for high performance. This product is perfect for heavy duty applications such as plant installations or heavy industrial work. The nutsetter is part of the Bosch Pick and Click system, which enables individually buildable accessory sets for fully customisable bit collections. Click-fitting slots perfectly secure individually purchased packs for a personalised collection and the easy replacement of old packs.
