PRODUCT DESCRIPTION

The T 101 AIF Clean for Hard Wood Jigsaw Blade delivers clean straight cuts in wood. Its precision-ground teeth with taper-ground body cut cleanly. Made from BIM (bi-metal), its fully hardened HSS (high-speed steel) tooth strip is bonded with its highly elastic HCS (high carbon steel) body, making the blade appropriate for cutting hard materials such as hardwood and abrasive woodworking materials. Additionally, a pointed tooth design reduces tear-out. It is equipped with a fine tooth pitch (1.7 mm) for cutting thin, solid wooden materials with 2-30 mm thickness.
