PRODUCT DESCRIPTION

The T 102 BF Clean for PMMA Jigsaw Blade delivers clean straight cuts in plastic. Its side-set, precision flank-ground teeth provide clean cuts, while its tooth geometry is designed to prevent melting when cutting PMMA acrylic sheet. Made from BIM (bi-metal), its fully hardened HSS (high-speed steel) tooth strip is bonded with its highly elastic HCS (high carbon steel) body, making it appropriate for cutting abrasive thermoplast plastic materials. It is equipped with a fine tooth pitch (1.8 mm) and cuts plastic sheets with 2-20 mm thickness.
