## PRODUCT DESCRIPTION

The T 121 BF Speed for Metal Jigsaw Blade delivers fast straight cuts in metal. Featuring a patented back-taper body and thin kerf design, the blade provides unrivalled cutting speed. Additionally, a patented tooth geometry and a combination of aggressive and robust teeth further increase cutting speeds. The blades milled, wavy-set teeth are designed for cutting metal sheet. Made from BIM (bi-metal), its fully hardened HSS (high-speed steel) tooth strip is bonded with a highly elastic HCS (high carbon steel) body, reducing the risk of breakage and making the blade breakproof. Furthermore, it provides both sufficient hardness and the required flexibility to cut perforated sheet metal made of standard-strength steel. The jigsaw blade is equipped with a fine tooth pitch (2 mm) and cuts medium-thick metal sheets with 2.5-6 mm thickness.
