PRODUCT DESCRIPTION

The SDS plus Mortar Raking Chisel is ideal for removing mortar between bricks. The design of the chisel offers precise and fast progress even in complex angles without damaging the bricks for exceptional ease of use. Its flat scraper design ensures efficient material removal and prevents the chisel from becoming stuck in the joint. Additionally, for easy guidance and control in the centre of the joint and to allow prebreaking of the mortar, it is equipped with an effective mortar-breaking edge. The chisel is intended for use in mortar and brick to remove mostly vertical mortar joints. The SDS plus Mortar Raking Chisel has two thicknesses to fit all standard mortar joints and to ensure precise fit between bricks.
