PRODUCT DESCRIPTION

The Starlock ATZ 52 SC scraper provides reliable removal of hard residues. Its sharp blade is ideal for solid, brittle material removal. It features a rigid, firm body design made of HCS (high carbon steel), making the scraper robust and resilient to bending when efficiently removing solidified residues. It reliably removes mortar or tile adhesive, mortar and concrete residues and hard carpet adhesive residues. The Starlock Snap-In mounting system allows fast blade removal and exchange within 3 seconds without having to touch the blade. The mounting system produces the highest power transfer due to a 3-dimensional tight-fitting connection between machine and accessory.
