## PRODUCT DESCRIPTION

The S 528 DF Special for Plaster Reciprocating Saw Blade delivers clean curved and plunge cuts in special materials. Featuring pointed teeth, it delivers tear-free results, while its fully tapered body provides easy access to hard-to-reach areas. Moreover, a pointed tip makes the blade appropriate for plunge cuts. Made from BIM (bi-metal), the blades fully hardened HSS (high-speed steel) tooth strip is bonded with an elastic HCS (high carbon steel) blade, making it appropriate for cutting abrasive materials such as plasterboard. Its short length of 100 mm enables a cutting capacity of up to 50 mm.
