## PRODUCT DESCRIPTION

The Standard for Wood Slotting Cutter delivers a high cutting performance when routing grooves in narrow edges. It features a high-quality tungsten carbide cutter for durability and reliable cutting results. Furthermore, the bit prevents kickbacks by limiting thickness of the generated chips. It is intended for work in soft and hard solid wood as well as wood composites. The Standard for Wood Slotting Cutter is appropriate for producing and positioning grooves in narrow edges such as for tongue and groove joints. The ball bearing allows for easy guiding directly on the workpiece without a side fence.
