PRODUCT DESCRIPTION

The 1.2/18g Narrow Crown Staples are resin coated and feature a chisel point, making them suitable for use as fasteners in a variety of interior fitting applications. They are equipped for attaching heat insulation materials, fibre plasterboard, upholstery, steps and handrails. The staples can moreover be used for building fences and for door, window and picture frames as well as for securing wooden floors. Their narrow crown is especially suited for decorative tasks because their spine penetrates deeply into the wood and is barely noticeable. Furthermore, they are galvanised to protect against corrosion. All staples are manufactured in Europe to guarantee consistently high quality.
