PRODUCT DESCRIPTION

The Standard for Wood Straight Bit offers a high cutting performance in general routing applications. It features a high-quality tungsten carbide cutter for durability and reliable cutting results. Furthermore, the bit prevents kickbacks by limiting the thickness of the generated chips. It is intended for routing grooves, slotting, rebating and jointing in soft and hard solid wood as well as wooden composites. The bit's longer working length enables greater flexibility and deeper cutting in thick working materials.
