PRODUCT DESCRIPTION

The Top Precision Best for Laminated Panel Abrasive Circular Saw Blade performs highly demanding applications in abrasive laminated panel. Its unique Extra Hard Microteq teeth made from very durable carbide grains are manufactured in-house by Bosch and ensure an industrial-grade high performance. The blade´s high-precision cutting is supported by Stabilteq Polyurethane-filled anti-vibration slots that significantly reduce vibration and noise, which also allows for comfortable work. To further strengthen its high quality, the circular saw blade features a Cleanteq coating that reduces adhesion of such residues as resin and glue to ensure extra-clean results. Moreover, the Cleanteq coating keeps the blade cool, protecting it from corrosion. The saw blade is perfect for use in chipboard and abrasive panel materials that are coated on one or two sides. The Top Precision Best for Laminated Panel Abrasives Circular Saw Blade features HLTCG (High-Low Triple Chip Ground) teeth. HLTCG teeth make the blade robust for working on abrasive materials.
