**ROBERT BOSCH POWER TOOLS GMBH
WIRE WHEEL CRIMPED 70X0.3 MM
STAINLESS. FOR ROTARY
DRILLS/DRIVERS**

SKU: 3165140632010

Wire Wheel Crimped 70x0.3 mm Stainless.
For rotary drills/drivers

Categories: [Accessories for BOSCH professional](#), [Cutting, roughing and brushing](#)

Product Features: Diameter mm: 70
Wire thickness mm: 0,30
Max. speed rpm: 4.500
Brush width mm: 10
Securing: Straight shank
Material: Crimped wire
X-LOCK: no
Benefit HL (short): Fine Finish on Stainless Steel
Performance Claim Text: Fine Finish on Stainless Steel
(Version) Key RTB: Crimped wire for light-to-medium-duty cleaning applications
Specific RTB1: Removes annealing colour on welded seams, cleans stainless steel/aluminium/non-ferrous metal surfaces, in grooves/edges
Specific RTB2: Also suitable for removing rust, roughing, mat sanding, texturing and paint stripping
Specific RTB3: Available in different thicknesses. Thicker wires deliver a coarser yet faster finish; thinner wires for finer results
Material: Stainless steel
Product text, Accessories grey: **Wire wheel - crimped wire**
Product text, Accessories grey: **Ideal for** removing annealing colour from welded seams on stainless steel.

Product text, Accessories grey: **Suitable for** light to medium duty cleaning work on small surfaces, in grooves or on edges on stainless steel, aluminium or non-ferrous metals, such as removing rust, roughing, matt sanding, paint stripping, texturing.

1 ST Wire Wheel Crimped 70x0.3 mm
Stainless. For rotary drills/drivers |

PRODUCT DESCRIPTION

The Wire Wheel provides a good fine surface finish. Fitted with crimped wire, it is ideal for light-to-medium duty cleaning applications on small surfaces. The Wire Wheel is intended for removing annealing colour on welded seams and is suitable for cleaning work on smaller stainless steel, aluminium or non-ferrous metal surfaces, on edges and in grooves. It is also suitable for removing rust, roughing, mat sanding, texturing and paint stripping. Brush wires are available in different thicknesses for variable levels of abrasive needs. Thicker wires are more aggressive, producing a coarser yet faster surface finish, while thinner wires deliver finer, smoother surface results.
